

### Science in the Pub –Xurxo Mariño “Cell phones, radiation and health”

19/04/2013.- Last night **Dr Xurxo Mariño** – neuroscientist and science communicator- joined the SRUK/CERU researchers for a beer and bit of science in the Audley Pub in London. Dr Xurxo Mariño discussed with humour, sarcasm and scientific evidence that the radiation emitted from mobile phones cause no damage effects to human health. Xurxo drove the audience in an engaging and fun trip through physics, neurophysiology and cosmic “empanadas”. A talk full of twists and turns, Sumo dancers, mathematical 3D models of galaxies, conversations between neurons, a pure delight that has set a high standard for future speakers.

If you have missed Xurxo’s talk, do not despair as he has promised to come back to London for some more SRUK/CERU Science in the Pub.

Dr Xurxo Mariño is a neuroscientist working at Universidad de la Coruña, Spain. He is also a science communicator. He is deeply involved in science engagement activities, where he makes science accessible to the general public. Dr Xurxo Mariño is the author of the popular science book “Neurociencia para Julia”.
